

Environmental Solutions Individually Designed

Since 1994 DELTA Umwelt-Technik GmbH has been a **reliable and competent** partner in the field of environmental engineering, offering custom-tailored solutions for clients. We have great expertise in **eliminating toxic substances in liquids, gases and solids**. We achieve convincing decontamination levels for various pollutants on an economical basis.

SERVICES

A major focus of the company is to **provide and operate** treatment plants for **water and process water purification** that are customized according to technical and economic needs. Additionally we offer solutions for **exhaust air treatment** and **contaminated soils**. We optimize water circulation in production processes and reliably implement our plant-specific technology. Working closely with our clients, we develop solutions for purification and recirculation of water and provide all necessary equipment. Thus, costs for waste disposal, resources and energy can be significantly reduced.

Our many years of experience in water treatment and restoration are reflected in the **modular configuration** of our systems. As a consequence, a **high degree of flexibility** provides an easy change in operation parameters. As an independent, owner-managed company DELTA Umwelt-Technik GmbH can develop **ideal solutions** for water, soil and air treatment. Our strengths lie in individual selection and evaluation of the appropriate processing method and its exact dimensioning. Intensive research and development allows us to successfully develop, patent and implement **innovative and effective processes**.

Quality and safety always have the highest priority. In order to guarantee this DELTA Umwelt-Technik GmbH is an accredited specialist under the German Federal Water Act "Wasserhaushaltsgesetz" (WHG) and according to DIN EN ISO 9001:2015.

MAIN EXPERTISE

- Project development
- Project management
- Engineering
- Construction and operation of treatment plant
- Process water treatment and optimization
- Groundwater decontamination

Biological groundwater treatment plant in Erkner (Berlin)

OXY-PURE® for catalytic wet oxidation at the site of a former coking plant in Zwickau (D)

Neutralization of wastewater from textile industry in Sri Lanka
